BEST-BSIERP monthly PI teleconference
13 January 2010
Meeting notes

In attendance: Mike Sigler, Rodger Harvey, Nick Bond, Franz Mueter, Elizabeth Siddon, Doug Reese, Carin Ashjian, Bill Wiseman, Dan Roby, Dave Irons, Will Satterthwaite, Marc Mangel, Andrew Trites, Jennifer Sepez, Anne Hollowed, Phyllis Stabeno, Henry Huntington, Alan Haynie, Tom Van Pelt.

This call departed from our usual format; the main focus of the call was to get feedback from the PIs on the "Headlines" plenary talk that Mike Sigler and Rodger Harvey (together with other SAB members and program managers) have been developing, based on the "meso-scale" talks presented at the October 2009 PI meeting in Girdwood.

Notes:

BEST-BSIERP at the Alaska Marine Science Symposium: Tom reminded everyone of the PI meeting to be held next week in conjunction with the Alaska Marine Science Symposium, from 1:30 to 3:30 pm on Tuesday 19 January, in the "Quarterdeck" room at the Captain Cook Hotel. All BEST-BSIERP participants are invited and we hope to see you there! The PI meeting will be followed by a Science Advisory Board meeting from 3:30 to 5:30 in the "Club Room II" at the Captain Cook. Info is also posted at: http://bsierp.nprb.org/meetings/index.html

"Headlines" synthesis presentation: Mike Sigler introduced the draft Headlines presentation. Mike and Rodger led discussion of the draft. Based on comments and discussion, they'll produce another draft for review during Tuesday's PI meeting; we'll circulate that draft prior to the meeting. During the Tuesday PI meeting, Mike and Rodger will do a test run through the presentation, and then there'll be time for discussion afterwards.

Upcoming "FEAST-Biologists Workshop": Anne Hollowed reminded everyone of the FEAST-Biologists Workshop to be held at AFSC in Seattle on two days: 11 February (focus on fish growth, bionenergetics, consumption rates and timing) and 18 February (fish spatial distribution and movement: location, drivers and timing). These meetings are intended as another opportunity for observationalists and fieldworkers to get together with modelers to continue the two-way discussions about model inputs, assumptions, etc. This is particularly relevant now as the modeling runs will be beginning very soon (April).

The workshops will be available via Webex and will be held in Seattle in the NMML Seminar room at the Alaska Fisheries Science Center, 9:30-4:30. The organizers welcome interested BEST-BSIERP people who can contribute to the discussion. If you have general questions about the workshops, contact Anne Hollowed (anne.Hollowed@noaa.gov) and/or Ivonne Ortiz (ivonne.Ortiz@noaa.gov). If you want to attend either in person or by WebEx, please contact Ivonne Ortiz so she can add you to the list of attendees and send you materials in advance.

Next meeting: The next regularly scheduled PI teleconference is Wednesday 17 February, at 1000-1130 Alaska time. As usual, Mike Sigler will circulate a reminder prior to the meeting, with agenda and call-in info. Contact Mike, Rodger, or Tom if you have agenda items for this scheduled call or other upcoming meetings.

Subject: WEDNESDAY PI CALL TO REVIEW BEST-BSIERP 2009 HEADLINES TALK

Wednesday January 13, 900-1030 am Alaska time

At this PI call, we will review the current draft of the BEST-BSIERP 2009 headlines talk which the SAB has been working on recently.

Take a look. PI comments are needed!

Download the talk before hand as the download takes several minutes. A copy of the draft talk is located on the NPRB ftp site.

```
Here are instructions for accessing the FTP site:
Do NOT use a web browser.
Instead, open a window on your computer, such as My Documents.

In the address bar at the top, type: ftp://prs2006:sy6ykisu@test.nprb.org/
AMSSHeadlines/

This address will get you right to the talk (look at V4)
```

PARTICIPANT - JOIN AN ON DEMAND PLUS CALL:

1 - Dial the toll-free On-Demand Plus Number: 888-387-8686
2 - Enter the Room number: 5273568 and press #
3 - You will be placed directly into the meeting if the moderator has already joined.
If the moderator hasn't joined, you will be placed on hold for up to 10 minutes.
(For international users, dial 001-303-928-3281)
